

Interface Solutions offers a line of Engineered Composite Materials that fall into three categories: Gasket materials and Rubber-Edged Composites for Automotive, H.D. Diesel, Small Engine, and Refrigeration Compressors, and Other Engineered Composite Materials for a range of Industrial applications.

Gasket Materials

Rubber-Edged Composites

Rubber-Edged Composites (REC) Sealing technology that turns gasketing problems into cost-saving, reliable solutions.

Decorative Covering Materials

Interface Solutions highly developed expertise in producing latex and fiber composites is the bases for a line of materials with excellent coating and embossing capability.
