### United States

The following list contains the USA gasket manufacturers that Interface Solutions, Inc. sells to on a direct basis. These customers comprise what we refer to as our "Value Added Network" or VAN. A guideline for entry level membership into the VAN is purchasing a minimum of \$100,000 annually of all products combined that ISI offers for sale. If you are interested in joining the VAN please contact **Bill Cassidy**, GM- North American Distribution, for additional details on how you can join this growing group of North American fabricators who enjoy the benefits of dealing directly with ISI.

Companies that do not meet the guideline for entry level membership into the VAN can purchase ISI materials from Vellumoid (a VAN member who focuses primarily on distribution of material) or any member of the Value Added Network who chooses to resell our materials. You can access most VAN members directly via links contained in these listings
